

CAPS is the Climate Awareness Partnership for Sidmouth

CAPS objective is to raise our community`s awareness of the climate and our ability collectively to take action to reduce Sidmouth`s carbon footprint.

Current activities and focus: -

- **Organising talk on sustainable behaviours:**
 - These will be organised on behalf of Sidmouth Town Council and be offered to Partners and other organisations across Sidmouth
- **Publicising national and regional support to help households reduce their carbon footprint**
 - This will also explain when this can help save individuals money
 - Aiming to promote the work of Exeter Community Energy (ECOE)
- **Seeking out opportunities to help households live more sustainably**
 - This will share practical ideas that could be adopted by Sid Valley residents
- **Provide an electronic newsletter celebrating success**
 - This will be provided to individuals, as well as organisations, and will highlight positive carbon reduction activity in Sidmouth and beyond, promote future climate related events, and inform individuals of opportunities to get involved.
